### ***Description:***

**InwallTech** full range of stereo custom installation Loud-speakers have been designed for easy In-Wall or Ceiling mounting. Please read the instructions thoroughly before beginning, then select the proper hook-up configuration and follow the step-by-step instructions for a successful installation and years of listening pleasure.

### ***Mounting Considerations:***

**Caution:** When choosing a location for mounting the speakers, make certain the wall or ceiling material is sturdy enough to support the weight of the speakers

Decide where the speakers will be mounted Be careful not to mount them over a stud or any other obstruction and at least 1" from the stud. Be certain you can run the speaker wire to the point where the speaker will be mounted.

**InwallTech** recommends 16 gauge speaker wire for distances up to 100 feet. For lengths up to 150 feet use 14 gauge speaker wire. Lengths over 150 are not recommended.

### ***Mounting Instructions:***

1. Using the template as a guide (Inside Speaker box) carefully cut a hole in the wall or ceiling. Find the speaker wire leads and pull them through.

2. Just simply remove the grill towards you.

3. Hook-up the pre-wired speaker leads to the input terminals as necessary.

**Note:** Be sure to observe proper polarity when connecting the speaker wire to the speaker.

**Red=Positive(+)**

**Black=Negative(-)**

4. Place the speaker in the cutout.

5. To install the speaker assembly, begin rotating each of the 4 screws attached to the dog-ears (locking clamps), first counterclockwise about 1/4 of a turn (this loosens the clamp to swing freely)

6. Begin tightening (turning clockwise) the screw until the clamp begins to snugly tighten the speaker to the wall. **Note: Do not over tighten the screws as the clamps can break with too much pressure.**

7. Place the grill on top of the mounted speaker. There are magnets in the speaker assembly to hold the grill in place.

8. The speaker system is now ready to be turned on.

9. For removal of the custom installation speaker, remove the grill. Turn the (4) locking screws counterclockwise until they release from the wall or ceiling. Pull the system out and disconnect the speaker wires.

## TRIMLESS 6.5" 2-WAY IN-CEILING SPEAKRS

### TM6A

- **LIFETIME WARRANTY**

- **Speaker Assembly:** Mounted in 20 degree angled housing.
- **Grill:** Trimless Rarefied™ Grill
- **Woofers:** 6.5" Apolymer-Cones™ with mica, rubber surround, 20 oz Magnet, 1" voice coil.
